Displaying A Repository's Commits

SEND FEEDBACK

TIP: In lesson 2 you used `git clone` to clone the blog project. This is the project we'll be using in this lesson. If you skipped cloning the project in the previous lesson, then run the following command to get the project:

```
$ git clone https://github.com/udacity/course-git-blog-project
```

Don't forget to `cd` into the project after you've cloned it.

If you have questions about this, review how to Clone An Existing Repo or ask in Knowledge.

QUESTION 1 OF 7

After you've cloned the blog project repository, navigate to the project's directory using the command line. Once you're located inside the blog project, what is the very first thing you should do in a Git repository?

- ☒ run the `git status` command
- ☐ open the project in a code editor
- ☐ decide what new feature to work on

ENVIAR

```
richardkalehoff (master) course-git-blog-project  
$ git status
```

Displaying A Repository's Commits

SEND FEEDBACK

- to scroll up, press
 - `k` or `|` to move up, one line at a time
 - `u` to move by half the page screen
 - `b` to move by a whole page screen
- press `q` to quit out of the log (returns to the regular command prompt)

Git records a ton of information when a commit is made. See if you can use `git log` to answer the following questions!

QUESTION 4 OF 7

Use `git log` to find the commit that has a SHA that starts with `f9720a`. Who made the commit?

- ☐ James Parkes
- ☒ Richard Kalehoff
- ☐ Colt Steele
- ☐ Julia Van Cleve
- ☐ Godzilla McFiddlebrunches

ENVIAR

What is The Message?

Use `git log` to find the commit with the SHA that starts with `8aa6668`. What is the message for that commit?

classroom.udacity.com/courses/ud123/lessons/280d5cfd-6440-4d27-97d1-d96118359bc/concepts/ud1186d3-9138-4a41-a089-d6a3b77e99ff
